## Steam-Trac ST-1600

## Direct Reading Steam/Water Level Gage

For 1600 PSI Working Steam Pressure (WSP)

- Fully compliant with ASME as a Direct Reading Water Gage
- Multiple sections with minimum 1" overlap
- Spring washers for constant torque
- Recessed gasket face in chamber and cover
- Custom built per specifications
- Studs, nuts and washers are nickel plated
- High temperature coating

Steam-Trac ST-1600 steam gages are ruggedly built to set the industry standard for reliability in the difficult mid-pressure range from 1000 to 1600 PSI Working Steam Pressure. All material and construction standards are within strict compliance of ASME section 1 code requirements.

The Steam-Trac ST-1600 can be configured to replace less durable, more expensive competitive models or for specific construction products. Visible
 range must be achieved by using multiple sections with a minimum 1 " overlap to ensure continuous visibility, as required by ASME Section 1, PG-60.

## Standard Materials

Chamber: A516, Grade 70 Carbon Steel
Gasket: $\quad$ Grafoil® GHR
Shield: HQ Mica
Glass: Tempered Borosilicate
Cover: $\quad$ A516, Grade 70 Carbon Steel
Washers: 17-7PH Stainless Steel, Nickel Plated
Studs: A193-B7, Nickel Plated
Nuts:
