**Confidence commands its own category. Introducing Level ARC by Questtec Solutions.**

Our Partners will repair Liquid Level Gages and Valves,  
Boiler Gage Glass, Probe Columns/Control Units, Bridle.

### **Questtec Level ARC Network**

Questtec has developed an impressive global network of Level ARC Centers. These independently owned and operated level repair facilities with Questtec Certified and Trained Technicians. Our Level ARC Centers are customer focused, provide asset management solutions that keep plants safe, and deliver overall peace of mind.

#### **Our Level ARC Centers have the ability to:**

- Provide Local Inventory
- Diagnose and solve your level problems
- Provide Level Gage Survey for Turn Around Support
- Track and manage maintenance and repair history
- Reduce plant downtime with local service, and field service capabilities
- Certified Welders

### **Level ARC Expertise**

Questtec Solutions understands the need for liquid level gage expertise and the Level ARC team is designed to be your solution source. Questtec offers multiple training programs throughout the year to support our Level ARC program. Questtec offers Certification Training as well as Advanced Training educating technicians in both the theory and hands-on operation of liquid level gages & valves. When needed, Questtec is available to also provide maintenance training for end users.

### **Level ARC Centers - Fast Track Response**

We provide quick ship gages and parts for customer's planned and unplanned outages through our Level ARC program. Multi-layered support is provided by local Level ARC inventory, and the Houston, TX Questtec factory. Whatever size of the job or unique requirements, our experienced staff and fast pace capabilities can deliver superior results.

### **Emergency: Service, Supply & Support**

Questtec helps Level ARC Centers and end users manage costly plant downtime by offering solutions for level gage requirements that occur after-hours, on weekends or during holidays. Our Level ARC emergency technician can locate the required parts and inventory to bring a customer's plant back online.

### **Level ARC Warranty**

Each Level ARC repair is backed by a warranty just like a factory new assembly. Each repair is finalized by a QA/QC phase including a hydrotest per ASME B31.3, 1.5 x Rating with 10-minute hold. Therefore when you receive a Level ARC repaired level gage, it will perform like a new assembly.

**The right level of maintenance you require for the complete life-cycle of your instrumentation.**
